The following is an examiner's statement of reasons for allowance:
No reference was found or a combination of references found anticipating a current coil arrangement in an electric meter wherein the combination of elements as presented in claims 22 or 26 includes the blade contact portion including a flexible member biased toward and disposed against the middle portion of the first current coil or wherein the combination of elements as presented in claim 29 includes the blade contact portion including an opening with the middle portion of the first current coil passing through the opening.

Claims 2-11, 22-24 and 26-31 are allowed.

This application is in condition for allowance except for the following formal matters:

The specification is objected to for having inconsistent reference to numbers identifying elements of the drawings. The specification should be revised to be consistent with the drawings.

The drawings filed on February 2, 2006 are objected to for having numerous numbering errors. Some numbers are used to designate plural elements and some numbers appearing in the specification are not present in the drawings at all. The drawings should be revised to be consistent with the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).
